About the Aquaculture Stewardship Council

The Aquaculture Stewardship Council (ASC) is an independent, not-for-profit organisation established in 2010 to set and operate global standards for responsible aquaculture. They work globally, to set and operate global standards for responsible aquaculture by promoting certified farmed products to consumers, through the use of their logo.

The organisation's vision is:

'A world where aquaculture plays a major role in supplying food and social benefits for humanity whilst minimising negative impacts on the environment'

and its mission is:

'To transform aquaculture towards environmental sustainability and social responsibility using efficient market mechanisms that create value across the chain.'

ASC sets and operates global standards for aquaculture to identify farms that have met the highest standards for environmentally and socially responsible practices. The ASC traceability controls throughout the supply chain ensure the provenance of ASC certified and labelled products. Certified farmed products are promoted to consumers through the use of the logo.

The Challenge

The aquaculture industry is growing steadily and is already supplying more than half of all seafood consumed worldwide. This growing demand increases the environmental and social footprint associated with this expansion; which ASC seeks to reduce.

The Solution

The purchase of ASC certified seafood helps to provide millions of people with cleaner, healthier, and safer farm-raised seafood. It helps to conserve and restore the world's oceans, coasts and wildlife and improve the lives of seafood farmers and local communities in the developing world.

ASC acts in the marketplace to increase the awareness, value, demand, and distribution of ASC certified seafood. We work with aquaculture producers, seafood processors, retail and foodservice companies, scientists, conservation groups and the public globally to promote the best environmental and social choice in farmed seafood. For more information go to www.asc-aqua.org.

The Organisation

ASC is comprised of a group of dedicated staff and is a growing organisation. ASC has

130 people working from various countries, including the Netherlands, UK, Germany, Spain, Australia, Japan, China, Thailand, Indonesia, Vietnam, Brazil and the US. There are three functional Departments covering: Markets and Communication, Technical Operations, and the Central Services team. Although staff work primarily from home, ASC operates offices in Utrecht (NL).

ASC are committed to transparency, independence and stakeholder participation and its Technical Advisory Group ensures the ASC has formal guidance from technical experts from across ASC's stakeholders for specific standards or process updates.

Governance

ASC's Board sets the strategy, provides oversight, and supports and challenges the organisation to achieve the greatest impact possible.
